

RISHI DUSANE

Software Engineer

+91-9834080685 | rishidusane5@gmail.com | Pune, Maharashtra | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Software Engineer with a Post Graduate Diploma in Advanced Computing and a foundation in Java, Spring Boot, React.js, JavaScript, SQL, and Python. Experienced in building full-stack web applications with layered backend architecture, REST APIs, JWT-based authentication, and relational/document databases. Strong problem-solving ability backed by 200+ solved DSA problems, with a structured, detail-oriented approach carried over from prior analytical work. Quick learner and team-oriented, seeking an entry-level Software Engineer role to contribute to real-world development projects.

EDUCATION

CDAC Post Graduate Diploma in Advanced Computing (PG-DAC)

Aug 2025 - Feb 2026

IACSD, Pune | Score: 70%

Bachelor of Engineering

Jul 2018 - Jun 2021

Dr. D. Y. Patil School of Engineering, Pune | CGPA: 7.91

Diploma in Engineering

Jun 2015 - Jun 2018

Government Polytechnic, Awasari (Khurd), Pune | Score: 70%

SKILLS SUMMARY

- **Languages** - Java, JavaScript, Python (problem-solving/scripting), SQL
- **Core Concepts** - OOPs, Data Structures Algorithms, Exception Handling, REST APIs
- **Backend** - Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT-based Authentication
- **Frontend** - React.js, Redux, React Router, HTML5, CSS3
- **Databases** - MySQL, MongoDB - schema/database design, query writing basic optimization
- **Tools Testing** - Git/GitHub, Docker, Maven, Postman, JUnit 5, Swagger/OpenAPI

KEY STRENGTHS

- **Problem Solving:** DSA, logical thinking, and structured problem breakdown.
- **Communication:** Clear technical documentation and effective written/verbal communication.
- **Learning Agility:** Quick to learn new technologies and apply them through hands-on projects.
- **Team Adaptability:** Collaborative, flexible, and comfortable working in different team and work environments.

PROJECTS

TripSync — Travel Booking Application (Personal Project)

[GitHub](#) 

Java, Spring Boot, Spring Security, React.js, Redux, MySQL, MongoDB, JWT, Docker

- Built a Spring Boot backend split into User, Booking, Payment, and Notification modules, exposing REST APIs with DTOs and centralized exception handling.
- Implemented authentication and role-based access (Admin, Agent, User) using Spring Security and JWT.
- Built the frontend with React.js and Redux for state management and React Router for navigation, connected to the backend via Axios.
- Used MySQL and MongoDB for relational and document data, containerized the app with Docker, and wrote unit/integration tests with JUnit 5 and Mockito; documented APIs with Swagger/OpenAPI.

Prime Properties — Real Estate Listing Application (Personal Project)

[GitHub](#) 

Java, Spring Boot, Spring Security, Hibernate, MySQL, JWT, React.js, Tailwind CSS

- Built a full-stack property listing app following a layered architecture (Controller → Service → Repository).
- Implemented DTO-based request validation and centralized exception handling using `@ControllerAdvice`.
- Built a responsive UI with React.js and Tailwind CSS for browsing and listing properties.
- Practiced query optimization using Hibernate JOIN FETCH and `@EntityGraph` to reduce redundant queries, and secured endpoints with JWT and role-based access; tested core logic with JUnit 5 and Mockito.

PROBLEM SOLVING C ACHIEVEMENTS

- **DSA Practice:** Solved 200+ problems on LeetCode and GeeksforGeeks, covering arrays, strings, linked lists, stacks, queues, recursion, and binary search.
- **Prior Background:** Prepared full-time for the UPSC Civil Services Examination (2021-2025) before transitioning into software development through PG-DAC; built structured analytical thinking, report-writing, and communication skills during this period.
